Abstract

Music dynamics is now infiltrated on the development of EDM (Electronic Dance Music) genre. Characteristics of those songs combine the beat, effects, and repetition of words. Those reasons make the EDM genre lovers dance. The genre is commonly found in bars, pubs, night clubs, performance and event venues (venues and appearances). This music genre is also found in radio and cable tv. Interestingly, the lyrics of the genre mostly use English. Although in this country, the lyrics sometimes are found in Bahasa. The lyrics in the EDM genre tend to be repetitive. Thus, the possibility of memorizing the lyrics in English may be higher. Memorize the lyrics in direct use when listening to the EDM genre, giving music lovers chance to produce acceptable pronunciation. The purpose of this study is to examine the mastery of English pronunciation through the lyrics of the EDM genre. The study involves three participants. This study uses descriptive qualitative method. The result of this research is that all participants feel helpful in improving English pronunciation ability by using EDM genre.

Keywords: EDM (Electronic Dance Music), Pronunciation Ability, English lyric

INTRODUCTION

English is one of the foreign languages commonly used by people in Indonesia. English has the special role in Indonesia. It is believe that English can be used as a tool of communication. The evidence is government of Indonesia put English as one of the lesson in high school for a long time. Thus, English as foreign language has been examined in Indonesia. Sometimes the student will get anxiety in facing English examination, especially in listening section, because they have lack of vocabulary. However, the way to decrease the level of anxiety is increasing vocabulary. On the other hand the problem is they have low motivation in listening toefl preparation. Commonly, they may enjoy listen to the music than listen to toefl preparation for improving the listening skill. Generally, the music has lyrics. Lyrics can help them in to produce English better. The researcher would like to give the easy way in understanding English by using lyrics of song. The students able to study something closely how message revealed from its lyrics, and found out the synonym of several words (Aimah, 2011).

Pronunciation or speech is a person's speech ability about how the notices the sound system. Furthermore, it affects one's speech. Thus, it will straight affect the meaning or connotation if in the English context. In English, different sounds diverge with meaning, let alone different script, and will greatly influence spoken communication. On the other pointer, language skills are not only inscribed skills but also verbal, and ironically, most people communicate verbally. Inappropriate speech will be the average that a person is unable to learn the language as entire. It is an indicator that there must be a way to do so can be minimized.
Hopefully, education system can be changed to be better. This incongruity is caused by one of which is the difference of concept in a language learned in the mother tongue. Different sound systems, psychological states that touch learning, the situation around the place of study, and the different facilities will affect the concept of understanding between students. Many theories that mentions the psychological or psychological disorder of a person greatly affect the result of a lesson. If a person feels happy and comfortable, usually someone will learn faster because of more motivation and reassurance big.

**EDM music**

Music is one of the entertainment that from the past until now is still growing rapidly and still much favored by all circles of society. Music itself has many genres ranging from the slow rhythm until the fast rhythm. One of the genre of music that is trending is EDM. Music EDM is one of the development of western music that entered into Indonesia as part of popular music. EDM is the driver of global digital music growth and global artist sales (D.LANGDON & C.LAI, 2013). In music psychology education, everyone needs music because music has an effect on humans that can be associated with everything such as physical, emotional, one's behavior, education, and imagination (Rukmana, 2015). The research about the influence of music has been done, and the positive impact found. EDM as the music that can be found easily in the sophisticated era, has become the research’s object that is interesting to be analyzed.

**Pronunciation**

pronunciation is one of the basic requirements of learners’ competence and it is also one of the most important features of language instruction (Gilakjani, 2016). According to Garcia (2007), English pronunciation is one of the most difficult skills to acquire and learners should spend lots of time to improve their pronunciation (Gilakjani, 2016). Hence, many research done to get the best way to enhance the pronunciation ability. In this research, the author use EDM music as the medium of instruction, because music believed can create comfortable learning environment that give positive effect to learning processes.

**METHOD**

This research is mainly descriptive qualitative. Descriptive research draws the collected data without any goals to get the general conclusion (Sugiyono, 2012). This study is conducted in IKIP Siliwangi Bandung. There are three participants in the research. This study employs some data collection techniques, using one questionnaire as instrument, classroom observation, interview, and document analysis as triangulation. The data analysis in this study is conducted over the course. All the data gained from the data collections are analyzed gradually. The data from questionnaires are transcribed and subsequently categorized, then interpreted to answer the research questions. The triangulations from interview, classroom observation, and document analysis are also interpreted descriptively.
